INDIAN INSURANCE YEAR BOOK, 1942.

N. B.—The publication of a summary of an insurer's or a provident society's returns in the Year Book does not necessarily mean that the returns summarised have satisfied all the requirements of the Insurance Act or that the Superintendent of Insurance approves of the contents of the returns.

FOREWORD.

Owing to war-time restrictions on the supply of paper it has been found necessary to continue to abridge the Year Book to some extent as in the last issue. Further, only a reduced number of 4,000 copies is printed this year to meet the orders already registered, and if this number proves insufficient it is hoped that the copies will be shared as widely as possible.

1 Crore = 100 lakhs = 1,00,00,000.

INDIAN INSURANCE YEAR BOOK, 1942.

Report by the Superintendent of Insurance on the Insurance business carried on by Insurers and Provident Societies during the year 1941.

The number of insurers registered under the Insurance Act, 1938 (not ineluding those whose certificates of registration have been cancelled) upto 1st April, 1943 is 302 of which 209 insurers are constituted in India, 91 outside India and 2 have standing contracts with members of the Society of Lloyds. Of the 209 Indian Insurers 77 have their head offices in the Bombay Presidency, 49 in Bengal, 32 in the Madras Presidency, 18 in the Punjab, 13 in Delhi, 8 in United Provinces, 4 in Central Provinces, 3 in Sind, 3 in Bihar, and 1 each in Assam and Ajmer-Merwara. Of the 91 non-Indian insurers, 60 are constituted in the United Kingdom, 21 in the British Dominions and Colonies, 3 in the continent of Europe, 6 in the United States of America, and 1 in Java.

- 2. Most of the Indian insurers carry on life insurance business only. They are 160 in number and of the remaining 49 Indian insurers, 24 carry on life business along with other insurance business and 25 carry on insurance business other than life. Of the Indian insurers 49 are either Mutual Insurance Companies or Co-operative Life Insurance Societies to whom Part IV of the Act is applicable. Besides the Indian Insurers, there are a few pension funds, mostly connected with Government services, which are exempt from the operation of the Act and this publication contains no particulars relating to them.
- 3. As regards non-Indian insurers, most of them carry on insurance business other than life. Out of the total number of 91 non-Indian insurers, 75 carry on insurance business other than life, 5 carry on life business only, and 11 carry on life business along with other insurance business. Of the latter 16 insurers, 11 are constituted in the United Kingdom, 4 in the British Dominions and Colonies and 1 in Switzerland.

The lists of Indian and non-Indian insurers published on pages 17—24 show the class or classes of insurance business for which they stood registered on 1st April, 1943.

LIFE INSURANCE BUSINESS.

- 4. The total new life insurance business effected in India during the year 1941 amounted to 2,00,000 policies insuring a sum of Rs. 39·51 crores and yielding an annual premium of Rs. 2·10 crores of which the new business done by Indian insurers amounted to 1,89,000 policies insuring a sum of Rs. 34·14 crores and having a premium income of Rs. 1·77 crores. The share of the British insurers in respect of new sums insured is Rs. 2·82 crores, of the Dominion and Colonial insurers Rs. 2·48 crores, and of the single Swiss insurer Rs. ·07 crore. The average sum insured per policy under the new policies issued by Indian insurers in India is Rs. 1,808 and under those issued by non-Indian insurers Rs. 4,781.
- 5. The total life insurance business effected in India and remaining inforce at the end of 1941 amounted to 15,92,000 policies insuring a total sum of

Rs. 291.65 crores including reversionary bonus additions and having a premium income of Rs. 14.53 crores. Of this the share of Indian insurers is represented by 14,27,000 policies insuring a sum of Rs. 237.24 crores and having a premium income of Rs. 11.27 crores.

6. The total new annuity business effected during the year 1941 was for the amount of Rs. 6,81,000 per annum of which the share of Indian insurers was Rs. 1,00,000 per annum. The total annuity business remaining in force at the end of that year was for the amount of Rs. 30,59,000 per annum, of which the amount payable by Indian insurers was Rs. 15,06,000 per annum.

Particulars relating to new business for 1941 and total business in force at the end of that year in respect of each Indian and non-Indian insurer are given on pages 25—34.

- 7. Some Indian Life Offices had been operating outside India, mostly in Burma, British East Africa, Ceylon, Federated Malay States and Straits Settlements. The total new sums insured by these Offices outside India in 1941 amounted to Rs. 2·54 crores yielding an annual premium of Rs. 0·15 crores and the total sums insured including reversionary bonus additions remaining in force at the end of 1941 amounted to Rs. 19·19 crores having a premium income of Rs. 0·97 crores.
- 8. The total new sums insured by Indian Life Offices in 1941 amounted to Rs. 36.68 crores, the total sums insured in force at the end of the year to Rs. 256.43 crores and the total revenue income to Rs. 15.69 crores. The average sum insured per policy and the average premium per Rs. 1,000 sum insured in respect of the new business for the year 1941 were Rs. 1,841 and Rs. 52.3 respectively, and the corresponding figures for the total business in force at the end of the year were Rs. 1,704 and Rs. 47.7.
- 9. The life insurance funds increased by Rs. 6.55 crores and amounted to Rs. 68.79, crores at the end of the year. The rate of interest earned on the life funds during the year after deduction of income-tax at source was 4.17 per cent.

The net rates of interest realized by the Indian Life Offices in each of the past five years are as follows:—

Year	1937.	1938.	1939.	1940.	1941.
Rate of interest per annum .	1.76	5.15	4.68	4.37	4.17

The total expenses of management expressed as a percentage of the premium income during each of the last five years are as follows:—

Year	••			1937.	1938.	1939.	1940.	1941.
Expense ratio		• •		32.2	31.7	33.2	28.9	27.4

If the figures of half 4 dozen insurers having the largest premiur income are excluded, the expense ratio in the case of remaining insurers is found to he as under .__

Year	••	 1937.	1938.	1939.	1940.	1941.
Expense ratio	• •	 42.2	41.1	41.8	36· 0	34.3

10. There were 175 Indian Life Offices which submitted their accounts and business returns for the year 1941 under the provisions of the Insurance Act. The present issue of the Year Book contains the results of the latest valuations of 159 of these Life Offices. Of the remaining 16 Life Offices none have yet reached the stage of having a valuation. The results of these valuations show that the Life Offices concerned had in the aggregate 14,15,000 policies in force on the valuation dates insuring a sum of Rs. 234.65 crores including bonus additions and annuities of Rs. 20.23 lakhs vielding an annual premium income of Rs. 11.54 crores. The life insurance funds of these Life Offices amounted to Rs. 59.86 crores. The valuations disclosed a surplus in the case of 87 Life. Offices and a deficit in the case of 72 Life Offices. The total surplus of these Life Offices amounted to Rs. 349.2 lakks of which Rs. 305.0 lakks was allocated to the policy-holders and Rs. 20.9 lakhs to the share-holders and the balance was either set aside as an additional reserve or was carried forward unappropriated. The deficit in the case of the remaining Life Offices amounted to Rs. 76.3 lakhs. Of these, the deficit in the case of 32 was covered by the available paid-up capital. In the case of the remaining 40 Life Offices the deficit was not so covered.

11. The following is the list of Indian insurers the transfer or amalgamation of whose business has been sanctioned by the Court since the issue of the last Year Book :-

Name of Insurer.

Transferred to or amalgamated with

Deccan Assurance Co., Ltd.,

Madras.

Bharati Bima Insurance Co., Ltd.,

Calcutta.

The Unique Assurance Co., Ltd., of Calcutta, and the Guaranteed Security Ins. Co., Ltd. of Ajmer have since been ordered by the Courts to be wound up.

VALUATION RATE OF INTEREST AND SECURITY OF INVESTMENTS.

12. In the Year Book for 1941 it was stated that although the tendency had been in the direction of lower rates of interest in the valuation bases, it was not yet possible to say that this tendency arose from anything more than pressure of immediate circumstances. It was too soon to form a definite opinion as to whether this was the only cause. The position during the year under review remained much the same, though this statement needs to be qualified by the fact that certain valuations were made at such high rates as

4-4½ per cent., on the strength of some wartime profits or unreal high yields based on deficit life funds. It would appear to be too optimistic, particularly in the case of young insurers without any special reserves built up in the past, to expect that the future interest earning power of the assets equivalent to their policy liabilities will be as high as the figures indicated above, having regard to the inevitable depreciation of industrial investments that is to be expected in the postwar period and the controlled money rates that are likely to continue. As war profits go, the actual yields shown by these insurers who expect a future net interest rate of 4 per cent. or more do not seem to be so high as to obscure the opposing forces which have time on their side. In any case, the position is not improved when the interest income credited to the life insurance fund is made up to a substantial degree by interest earned on assets not belonging to the life insurance fund, and further the life insurance fund itself is in deficit compared with the policy liabilities. It cannot be too strongly emphasised that the interest basis in the valuation means that the amount of policy liabilities estimated by the valuation will compound itself at that rate of interest, and therefore, unless the life insurance fund is at least equal to the amount of policy liabilities, any interest earning power estimated on the basis of the life insurance fund will have to-be reduced in a proportion dependent on the extent by which the interest income expected on the amount of the policy liabilities exceeds the actual interest income of the assets of the life insurance fund. It has become necessary, therefore, for the Superintendent of Insurance to ask for re-valuations being made in such cases, and he will continue to do so where the basis, whether of interest or of expenses, is not based on a realistic appreciation of future probabilities.

13. A special word has to be repeated, in continuation of what was stated in the last Year Book, in the case of those insurers who continue to receive or keep loans at interest, instead of calling up the un-called capital. The interest payment they have to make on such loans accentuates further the shortfall in the interest income they ought to earn on the assumptions made in their premiums or valuations. There are cases where this feature makes it difficult to justify the rate of even 3 per cent. in the valuation. One would expect that in these days when so many capital issues for large amounts have been floated in the market, there should be no difficulty for these insurers to insist on the uncalled capital being called up to the extent that would enable them not only to pay off their existing loans, but also to build up an adequate margin to pay such capital expenses of organisation as are not provided for in the premium income. The fact, however, is that even when the position comes to this—that the valuation shows up a large deficiency and the Superintendent of Insurance is forced to proceed to apply to Court for the winding up of the company under section 53 of the Act, generally more than a year after the date of the valuation, or again some months hence when the case comes to be heard in Court, the uncalled capital is not yet realised, and probably cannot be realised except through costly and protracted litigation against the shareholders, thereby reducing, the present value of the net amount that may mately be realised, to an insubstantial amount. The difficulty of realisation is probably increased by the result disclosed by the valuation, but insurers can anticipate that position by a proper appreciation of their actual interest income and expenses in the years before the valuation and realise the necessary uncalled capital even before the valuation date.

- 14. An important fact in this connection is the judgment of the Bombay High Court as regards the interpretation of section 27 of the Insurance Act, which requires a certain portion of the assets of insurers to be held in approved securities. The requirements of that section come into full force from 1st July 1943. The Superintendent of Insurance had to issue a large number of notices of default as at 31st December 1942, even though the section had to be complied with on that date only to the extent of 75 per cent. This, however, may be due to the fact that the Court's judgment, which held that the amount of investments required under that section was much more than what some insurers thought was enough, was delivered only in last September. It is hoped that all insurers will bring up their investment portfolios to the full extent required by section 27 from 1st July, 1943, and will maintain it thereafter at that level, remembering that the requirements of that section have to be complied with continuously every moment.
- 15. Responsible insurers seem to be agreed on the urgent present-day need for building up adequate reserves in consonance with the low interest rates that are likely to prevail in future. To many of them, who take a long view in this matter, section 27 only clinches the issue, as a pointer to, rather than as the source of, falling interest rates. Suggestions have come, however, from certain quarters, that the investments required under this section prevent or retard the industrial development of the country and that, but for this section, the future interest earning power of insurers would be higher, perhaps justifying valuation rates like 4 per cent. or more. Security to policyholders is the prime concern of the Superintendent of Insurance, and it may be argued that that essential security is not necessarily irreconcilable with the utilisation of insurance funds for industrial development. Perhaps section 27 too may have the benefit of this argument! Doubt may also arise whether industrialisation through insurance funds, presumably on the basis of a planned economy which, on the one hand, guarantees the minimum security required by policyholders and, on the other, ensures development on healthy lines, will not call for more control of the investments of insurance funds, whether on the lines of section 27 or otherwise. Be that as it may, a little inquiry into the total amount of investments in approved securities held under the compulsion of section 27, in comparison with the total amount already invested in industrial development, and may continue to be augmented from non-insurance sources of capital in the country, as well as the total amount of credits which this country is accumulating abroad and may be available later, at least in part, for industrial development, would probably show that the part attributed to insurance funds in this respect may be somewhat exaggerated, unlike the need for security to policyholders.
- 16. The summary of the assets of Indian insurers in para 29 of this report, shows that their total assets were only about 84 crores, of which a little more than half were held in approved securities; but not all the amount actually held in approved securities can be said to be so invested under the computation of section 27. Curiously enough, even before section 27 came into force in 1939, some of the wealthiest insurers, with persons on their directorate of wide indus-

trial connections, had always invested the major part of their assets in approved securities on their own initiative, sometimes bound by their own constitution, for a long period of 25 years or more, when insurers had full freedom of investment so far as insurance law was concerned. The assets of such insurers in approved securities would probably be not less than a half of the total amount in approved securities and it is unlikely that their choice has been fettered now by section 27. Further, that section applies only to life insurance business in India, whereas the above assets relate to all business, whether in or outside India, life or non-life. In the light of these facts, the amount compulsorily invested in approved securities under section 27 may be estimated at only about a fourth of the total assets of Indian insurers, that is, about 20 crores, if not less. This—or double this amount in view of Sec. 27 (3) of the Act—compares rather poorly with the hundreds of crores that have been and may continue to be available for industrial development from other indigenous sources. Does this comparison show that industrial development hangs in the balance on the manner in which insurance funds are required to be invested by the Insurance Act? It may also not be out of place to point out at this stage that no special approved securities appear to have been issued merely for the purpose of enabling insurers to comply with section 27, and therefore the inference may be drawn that insurance funds have only displaced private funds in the field of approved securities, driving them probably towards industrial securities. Section 27 may thus canalise the agency of industrial development through hands other than those of insurance managements who have a fulltime job of their own, rather than starve industrial development of necessary funds.

17. However, these aspects of section 27 interest the Superintendent of Insurance in the administration of the Insurance Act, only because he is usually asked to be guided mainly by the other side of the picture in justification of high rates of interest in the valuation bases he considers to be faulty. Experience of other industrialized countries may also be studied in this connection to see whether, even if insurance funds are utilised for industrial development, it would necessarily lead to high interest rates in the future. Perhaps the very need of keeping the cost to the country of industrial development within bounds will call for a more controlled money market. It would also appear that the very countries which are frequently cited as instances where insurance funds are used for industrial development, are precisely those where the insurance law is many times more stringent than the insurance law of this country, particularly as regards bases and methods of valuation of assets and liabilities and periodical inspection of insurers, irrespective of their standing. The insurance law of the United Kingdom is, of course, in a different category, but for all the freedom allowed under that law and the industrial development that has taken place in that country, the fact is that the valuation rates there are going down towards 2½ per cent. In any case, no evidence is available to show that sound insurers of any country anticipated under present-day conditions as high rates of interest as are supposed to ensue from the utilisation of insurance funds for industrial development in this country.

18. It may not be too far-fetched, therefore, to suggest that, in any order which provides for the necessary security to policyholders, with or without

industrial development which is not quite material for this purpose, valuations at lower rates of interest should be more frequently seen in the summary of valuations on pages 44 to 76. In so far as any rate can be suggested without reference to individual circumstances, the rate of $3\frac{1}{2}$ per cent. appears to be the maximum defensible at the present time. In many cases it may have to be less, down to 3 per cent., and the weight of income-tax or the need for maintenance of bonuses may depress these rates still further in future. Anticipation of low interest rates must undoubtedly increase the cost of insurance, and insurers who have not already done so will not be acting too prudently if they reviewed their premium rates at the present time. It becomes all the more desirable that they should keep down their expenses of management as some set-off against the fall in interest rates.

EXPENSES OF MANAGEMENT.

- 19. The trend of valuation bases as regards expenses of management may not, on the whole, be said to be quite as satisfactory as that of the interest rates. True, no doubt, that the best course about expenses is to reduce them in fact, instead of having to provide for a high rate of expenses in the valuation. This is realised by many insurers, as can be inferred from the figures of expense ratio given in paragraph 9 of this report. But there are still a number of insurers whose expenses are too high, and some of their valuations are misleading and heavily underestimate policy liabilities owing to the actual facts not being given their due weight. Too often it appears to be assumed in these cases that, whatever the management might have cost the insurer in the past—even double or treble the provision made in the premiums or in previous valuations if not more—and though the management is expected to be the same and everybody makes the general complaint that the costs of management are rising at the present time, partly due to competition and partly due to war conditions, future expenses of the insurer will be nothing more than about 20 per cent. or less, of his annual renewal premium income. It is generally admitted to be obvious that under the given conditions of management it would be impracticable for some years to come to reduce the high rates of expenses of the immediate past to the low levels assumed in the valuations, from which it would follow that the assumption made is too far removed from realities. This is sometimes defended on the plea that the valuation is made on a solvency basis, but it is clearly wrong even on a solvency basis to assume knowingly that the expenses in future will be less than what they are likely to be. A solvency basis pre-supposes that the insurer will cease to carry on new business, but a normal valuation under section 13 of the Act does not imply that new business will cease, except when the registration of the insurer remains cancelled. What a normal valuation under section 13 generally does is to measure the profit-earning power, or the new business earning capacity of the insurer, and where it is clear from the expense ratios of the past, and present trends, that the new business of the insurer will not be self-supporting but will eat into the premium income of the existing business for some years to come, it is surely a travesty of valuation to assume that the opposite will hold good immediately from the valuation date.
- 20. A consideration on these lines would appear to call for a more realistic appreciation of the actual expenses that will most likely be spent by the

insurer in question, allowing only for such improvements, and at such pace, as will be practicable under the given conditions of management. The expense provision made in the valuation should be at least equal to what such an appreciation calls for, if necessary at a decreasing rate instead of a uniform rate. If such a valuation requires increased reserves to be maintained, the result brings home to the management the financial consequences of their scale of expenses as nothing else can. A merely charitable assumption that expenses above the level assumed in the valuation will be met out of capital, without any measure of the adequacy of that capital, or that the management, in spite of the evidence of their past record, will perform the miracle of bringing a 60 per cent. or so, of expense ratio down to 20 per cent. in one year just because they are eager to promise to do so, can hardly be a justifiable substitute for a factual reading of the situation. Even if the expense ratios of the past are of the order of a persistent 30 to 35 per cent., it has to be remembered that the law of diminishing returns governs the achievement of economies also, further savings being realized more and more slowly, if at all.

- 21. Sometimes the impracticable promises of the management are supported by resolutions of shareholders, but the real point usually is the great discontinuity between the actual performance of the immediate past and the promises of the resolutions; it is that discontinuity that should suggest the inherent unreliability of reading the future on the basis of such promises or resolutions alone. The truth of this has actually been tested in this Office in a sufficient number of cases during the last several years. Further, the resolutions are not always passed at a well attended meeting of shareholders after a full discussion and understanding of all its implications—but only of a few persons in the management or the directorate and their friends. meetings may be quite legal, but such resolutions may not lend additional weight to what the management has already promised. It may therefore be pardonable to feel that where the shareholders have failed to scrutinise the annual accounts and control the expenses in the past, it would be more convincing if they have the valuation made on a proper basis and make good the resulting deficiency, if any, by putting up extra capital. Once the economies hoped for are actually realised, the shareholders too will reap their share of the resulting benefit. Under-estimation of liabilities and the consequent concealment, even temporarily, of deficiencies is rarely a sound practice, and it is less so at a time when money appears to be fairly cheap and therefore, the necessary capital should be easily realisable by any concern that is inherently sound.
- 22. Reference may also be made here to an interesting curve of expense ratios in which a few insurers seem to specialise. These insurers have undergone more than one valuation and the curve of expenses shows that they always shoot up to a maximum in the first or second year after every valuation and then gradually come down in the year before the next valuation to a figure nearly equal to the provision made in that valuation. The argument seems to be that since the experience of every inter-valuation period by itself shows a decreasing trend of expenses, the insurer can assume in every valuation that the expenses will, in future, either go on decreasing, or be stabilised at the minimum level reached in the year prior to the valuation. But the fact that such an assumption was made once or twice before and

was not realised in practice, as evidenced by the huge rise in expenses soon after the previous valuations, is not generally remembered when the same assumption is made at the next valuation also. The Superintendent of Insurance has not been able to agree to advantage being taken of a decreasing rate of expenses in this manner at every valuation, when the past experience shows that the decreasing trend will probably be reversed after the valuation. In such cases it becomes necessary to insist that the assumption about future expenses should be based on the average annual expenses of the period between the present and the next previous valuations, instead of on the minimum rate reached in the year just previous to the present valuation.

DELAYS IN COMPLYING WITH THE PROVISIONS OF THE ACT.

- 23. It was perhaps too soon to expect the remarks made in the last Year Book about the delays in the receipt of returns by the Superintendent of Insurance to have had effect in respect of the returns for the year 1941, but it was rather disappointing to find that as many as 29 insurers did not send in their applications for renewal of registration for the year 1943, or even the challans evidencing payment of the fees, for more than 15 days after the due date, 31st December 1942. This was the second year of renewal for all these insurers, and therefore a penalty of 75 per cent. (or 100 per cent., for the few who delayed in the first year also) of the renewal fee had to be charged in their case for the delay, as against 50 per cent. only charged for the late-comers last year, on the ground of its being the first renewal year under the Insurance Act. Since the renewal provisions should now be familiar to every insurer. the penalty for late renewal will hereafter have to be the maximum provided in the Act, subject to consideration for exceptional circumstances beyond the control of the insurer in individual cases. Where non-Indian insurers are mainly concerned the net Indian premium income for the previous year on which the renewal fee is based should be available long before December of every year, having regard to the provisions of section 64 of the Act. Any doubts about the actual fee to be paid in individual cases should be settled in advance, as soon as the figure of the previous year's premium income is available. For the convenience of insurers, however, the scale of renewal fees according to premium income is shown at page 16.
- 24. Most avoidable delays about the furnishing of the statutory returns will, it is hoped, be eliminated from the current year. The Insurance Year Book has usually been greeted with the complaint that it is issued about 21 months after the year for which particulars are given therein. But it is not the Superintendent of Insurance who takes up most of this time; rather a section of the insurers themselves. There would not be much exaggeration in saying that nearly 15 of these 21 months are taken up by many insurers in rendering their returns or in carrying on correspondence over them. The data are not necessarily complete even then, and the Year Book generally bears the marks of that incompleteness. The balance of 6 months is more or less evenly divided between the office of the Superintendent of Insurance and the Press, though there must be some overlapping between the groups. The minority of insurers whose particulars come in only at the fag end of the 15-month period, if not later still, constitute the weakest link of the chain,

and there can be no prospect of a material advancement in the date of appearance of the Year Book until all insurers furnish their returns with complete particulars well before the expiry of the maximum time allowed to them under the Act.

- 25. Some of the small sized insurers who do not need this maximum time, which has been fixed with reference to the biggest insurers, can help by furnishing their returns without insisting upon the legally admissible maximum time. Actually it has been found that some of them do not send in their returns earlier, even if they are ready, with a view to postpone publication of the unsatisfactory position shown in those returns. At the other end, non-Indian insurers can reduce their delays substantially by compliance with section 64 of the Act. Such delays are really at the bottom of the delay in the publication of the Year Book, though the pressure of war-time work on the Press may be contributing a small part of the delay at the present moment.
- 26. Mention may be made in this connection of the fact that this Office had to issue about 33 notices of action under section 102 of the Act in respect of delays in the furnishing of the statutory returns. Many of these notices had the desired effect of bringing in the returns without the worst of delays. but there have been a few cases of chronic delays despite the notices. Prosecutions have therefore been launched against some insurers, and the directors or officers concerned. According to the present advices, these prosecutions in respect of defaults in the furnishing of returns have to be launched in Simla, where the headquarters of the Superintendent of Insurance are situated and where the returns are due to be furnished. It is hoped that the necessity for such actions, at much expense and inconvenience to the persons concerned. will not arise in future and that the persons concerned will bestow serious and urgent attention to the preparation and furnishing of the returns at the earliest possible moment after the close of every year of account. In the case of valuations, most of the preliminary work can be done before the valuation date, with the help of consulting actuaries.

Fire, Marine and Miscellaneous Insurance Business.

27. The net Indian premium income of all insurers under insurance business other than life insurance during 1941 was Rs. 4,16 lakhs of which the Indian insurers' share was Rs. 1,51 lakhs and that of the non-Indian insurers Rs. 2,65 lakhs. The total amount is composed of—

Rs. 1,93 lakhs from fire,

Rs. 1,29 lakhs from marine, and

Rs. 94 lakhs from miscellaneous insurance business.

The Indian insurers received-

Rs. 78 lakhs from fire,

Rs. 35 lakhs from marine, and

Rs. 38 lakhs from miscellaneous insurance business.

The non-Indian insurers received-

Rs. 1,15 lakhs from fire,

Rs. 94 lakhs from marine, and

Rs. 56 lakhs from miscellaneous insurance business.

The distribution of this income amongst insurers constituted in different countries is shown in the following table:—

Insurers const	ituted i	n	Fire.	Marine.	Miscella- neous.	Total.

From the net figures given above it is not possible to form a correct estimate of the total business effected in India as a considerable portion of Indian business of both Indian and non-Indian insurers is said to be re-insured outside India.

28. The Indian insurers who transact a substantial amount of fire, marine or miscellaneous insurance business also operate outside India. These insurers had a net premium income of Rs. 1,03 lakhs in 1941 from business outside India.

Particulars of fire, marine and miscellaneous insurance business of Indian and non-Indian Insurers are given on pages 81—85.

Assets of Indian Insurers.

29. The following is a summary of the assets of Indian Insurers:

		*				Rs. In crores.
Mortgages on property						2.11
Loans on policies within their sur	render	values		• • •		7.62
Loans on stocks and shares, etc.			• •	• •	••	0.23
Otner Loans				• •	• •	0.29
Indian Government securities			• •		••	46.17
Securities of Indian States	• •				• •	0.47
British, Colonial and Foreign Go	vernme	nt Securit	ies			0.60
Municipal, Port and Improvemen	t Trust	t Securitie	s, etc.			6.02
Shares in Indian companies	• •		• •	• •		7.21
Land and house property	• •	• •	• •		• •	5·5 2
Agents' balances, outstanding pre	miums	, outstand	ing and a	ccrued in	aterest,	
etc	• •	• •	• •	• •	••	3.69
Deposit, cash and stamps	• •	• •	••	• •		$3 \cdot 27$
Miscellaneous	••	• •	••	••	• •	1.17
				Total	• •	84.37

It will be seen that the bulk of the investments are in stock exchange securities which amount to Rs. 58.89 crores after allowing for an investment fluctuation fund of Rs. 1.56 crores provided for in the balance-sheets and constitute about 71 per cent. of the total assets after deduction of the investment fluctuation fund.

Summary of balance-sheets of Indian insurers as at the end of the year 1941 is published on pages 86—117.

Indian Assets of non-Indian Insurers.

30. The total assets in India of non-Indian insurers amount to Rs. 28·54 crores of which Rs. 16·55 crores represents the assets of insurers constituted in the United Kingdom, Rs. 11·51 crores those of insurers constituted in the Dominions and Colonies, 0·31 crores of the American insurers, 0·13 crores of the Continental insurers and 0·04 of the one Javanese insurer. Out of this total amount of Rs. 28·54 crores, Rs. 24·98 crores represents assets in India of insurers who carry on life insurance business in India either solely or along with other insurance business. The assets in India of these insurers are shown on page 34. The assets in India of other non-Indian insurers are shown on pages 82—85.

DEPOSIT MADE BY INSURERS UNDER THE INSURANCE ACT.

31. Particulars of deposit made by insurers and provident societies up to 31st December 1942 have been published in the Gazette of India, Part II, dated the 27th March 1943.

PROVIDENT SOCIETIES.

- 32. The particulars of the provident societies are set out in the present Year Book in the same way as in the previous year. Between 1st April 1942 and 31st March 1943, 4 societies were newly registered under the Insurance Act, all of which were established in the Bombay Presidency. During the year 1942 the registrations of all the societies which had not made at least the initial deposit required in terms of section 73 (1) of the Act and whose registration had not been otherwise cancelled, were cancelled for non-renewal during the year 1942. On 31st March 1943 there were in existence 141 provident societies which had made at least the initial deposit under the Act while the number among them whose registration was renewed as on 1st July 1942, for one year from that date was only 132. The following paragraphs relate only to the societies which have made at least the initial deposit under the Act.
- 33. All the societies are carrying on insurance business under the contingencies covered by section 65 (2) (a) only. The total new business effected by the societies during the year 1941 amounted to 18,800 policies insuring a sum of Rs. 68,68 thousands and annuities for Rs. 2,500 per annum. The premium income received during the year on these policies amounted to Rs. 2,27 thousands. The business in force at the end of the year amounted to 69,700 policies insuring a total sum of Rs. 1,94,69 thousands including reversionary bonus additions and annuities for Rs. 18,200 per annum.
- 34. The total life insurance funds at the end of 1941 amounted to Rs. 51,90 thousands as compared with Rs. 47,23 thousands at the beginning of the year, showing a net increase of Rs. 4,67 thousands. The net rate of interest realized by the societies in the year was 3.9 per cent. and the total expenses of management expressed as a percentage of the premium income was 57.3. Out of 127 societies, which have submitted their returns for the period ending 31st December 1941, 35 had renewal expense ratios calculated in the prescribed way in excess of 100 per cent. and 35 between

50 per cent. and 100 per cent. This may be compared with the average provision for renewal expenses made in the premiums, in the rules or in the valuations, which is rarely above 25 per cent. Further, the life funds of 34 societies were negative. These facts speak for themselves and further comment is unnecessary.

A summary of the balance sheets as at 31st December 1941 and the revenue accounts for the year ended on that date are given on pp. 122—134 of this year book. The summaries of valuation returns appear on pp. 135—137.

- 35. Many societies do not make the instalment of statutory deposit required every year under section 73 of the Act, before the due date. During 1942, reminders had to be issued in a large number of cases followed up by notices in 21 cases, in respect of the instalments required to be made in 1941, before the societies complied with the requirements of the Act in this respect. It is difficult to understand this delay since the amount required for the deposit—a proportion of the premium income—is expected to be set aside out of the income as and when it is received. Any lapse in this respect cannot be excused by reference to high expenses.
- 36. A second round of inspection under section 87 of the Act of all the societies who had made a deposit and had not gone into liquidation was completed before the 31st December 1942. The inspection reports revealed the continuance of a very unsatisfactory state of affairs. In most cases as a result of the position revealed by the inspection the societies have been cautioned particularly in regard to excessive expenditure and compliance of section 85 of the Act. It is also hoped that the reports may have been of help to some societies whose managements were still ignorant of many of the provisions of the Act.
- 37. There appears to have been some recognition of the necessity for promptness in furnishing the returns under the Act within the time allowed; but the position still needs considerable improvement in this respect. In 8 cases notices under section 102 of the Act had to be issued for failure to furnish the returns. In the majority of cases, however, the returns were defective or incorrect even in the simplest particulars, and in a large number of cases the defects were not removed even after protracted correspondence, although the defects were pointed out more than once, and in 11 cases, the returns had actually to be declined under section 82 (3) read with section 21 (1) (d) of the Act, indicating, perhaps, that the managements had not appreciated the most elementary requirements of the Act.

MR. J. H. THOMAS.

38. Mr. J. H. Thomas, C.I.E., F.I.A., the first Superintendent of Insurance under the Insurance Act, retired from this post on 23rd June 1943, and reverted to the Government Actuary's Department, London. He came to India in June 1938, when the Insurance Act as originally passed in February 1938 had not yet come into force and the Rules thereunder had yet to be framed. During his tenure, the Act was amended substantially three times to bring it into proper shape in many respects, and the Insurance Rules were framed originally in 1939 and amended later consequent on the Actuardment Acts. He had also to set up the fairly large organisation of the Office

of the Superintendent of Insurance almost from nothing and initiate the operation of the various sections of the Act in a variety of cases. He was awarded the C.I.E., in the New Year Honours of 1943.

- 39. Every one who is interested in the welfare of life insurance in India and who came into close touch with Mr. Thomas in one capacity or another in his work for the last 4 years, would not have failed to notice the large extent to which he shared that interest and tried his best to achieve the objects of the Act with the least possible friction. The Year Book itself bears sufficient testimony to the sound standards he aimed at and the substantial progress made in that direction. The beneficent results of the spadework done by him will be felt in the coming years also.
- 40. In retiring from this post, Mr. Thomas carries with him the cordial appreciation of all his co-workers and their best wishes for his future.

SIMLA,

Dated the 1st July 1943.

P. V. KRISHNAMURTHY,

Superintendent of Insurance.

RENEWAL FEES.

A. The fee prescribed in Rule 24 of the Insurance Rules, for renewal of registration under section 3A of the Insurance Act, 1938, for each class of insurance business for which the insurer is registered is as follows:—

Where total premium income for each class (including annuity considerations, if any)*	Fee payable for each class. Rs.		
Does not exceed Rs. 1,00,000			. 50
Exceeds Rs. 1,00,000 but does not exceed Rs. 2,00,000			100
Exceeds Rs. 2,00,000 but does not exceed Rs. 4,00,000	••		150
Exceeds Rs. 4,00,000 but does not exceed Rs. 6,00,000			250
Exceeds Rs. 6,00,000 but does not exceed Rs. 10,00,000			375
Exceeds Rs. 10,00,000			500

*This income is the premium income shown in the revenue account for that class of insurance business prepared under the Act for the calendar year 1942, in respect of the renewal of registration for the year 1944, the application and chalan in payment of the fees for which should reach the office of the Superintendent of Insurance on or before the 31st December 1943.

In relation to insurers who are required to furnish returns in accordance with sub-section (2) of section 16 of the Act, the reference to the calendar year 1942 above may be construed as a reference to the accounting year 1941-42 covered by the revenue account furnished under clause a0 of the said sub-section, except where the calendar year 1942 is also an accounting year.

B. The next renewal of registration for provident societies under section 70A of the Act, is for the year commencing 1st July 1944, the application and chalan in payment of the fees for which should reach the office of the Superintendent of Insurance on or before the 30th June 1944. The fee for renewal of registration is Rs. 50 where the total gross premium income including annuity considerations, admission fees and other fees, if any, as shown in the revenue account for the calendar year 1942 (or 1943 where the returns for 1943 have been furnished to the Superintendent of Insurance) is less than Rs. 50,000 and Rs. 100 in all other cases.

List of Indian Insurers.

- Names of Insurers who are subject to provisions of Part IV of the Insurance Act, 1938, have been marked with (M).
- 2. In first column L stands for Life, F for Fire, M for Marine and Misc. for Miscellaneous.

Name of Insurer & Class(es) of business for which registered.	Year of estab- lishment.	Head Office.
Adarsha Bima Company L	1935	12, Sheocharan Lal Road, Allahabad.

## INDIAN INSURANCE YEAR BOOK, 1943.

N.B.—The publication of a summary of an insurer's or a provident society's returns in the Year Book does not necessarily mean that the returns summarised have satisfied all the requirements of the Insurance Act or that the Superintendent of Insurance approves of the contents of the returns.

#### FOREWORD.

Owing to war-time restrictions on the supply of paper it has been found necessary to continue to abridge the Year Book to some extent as in the last two issues. Further, only a reduced number of 4,000 copies is printed this year again and if this number proves insufficient it is hoped that the copies will be shared as widely as possible.

#### INDIAN INSURANCE YEAR BOOK, 1943.

Report by the Superintendent of Insurance on the Insurance business carried on by Insurers and Provident Societies during the year 1942.

The number of insurers registered under the Insurance Act, 1938 (not including those whose certificates of registration have been cancelled) upto 31st December 1943, is 314 of which 220 insurers are constituted in India, 92 outside India and 2 have standing contracts with members of the Society of Lloyds. Of the 220 Indian Insurers 84 have their head offices in the Bombay Presidency, 51 in Bengal, 35 in the Madras Presidency, 17 in the Punjab, 13 in Delhi, 8 in United Provinces, 4 in Central Provinces, 3 in Sind, 3 in Bihar, and 1 each in Assam and Ajmer-Merwara. Of the 92 non-Indian insurers, 61 are constituted in the United Kingdom, 21 in the British Dominions and Colonies, 3 in the continent of Europe, 6 in the United States of America, and 1 in Java.

- 2. Most of the Indian insurers carry on life insurance business only. They are 155 in number and of the remaining 65 Indian insurers, 34 carry on life business along with other insurance business and 31 carry on insurance business other than life. Of the Indian insurers 39 are either Mutual Insurance Companies or Co-operative Life Insurance Societies to whom Part IV of the Act is applicable. Besides the Indian Insurers, there are a few pension funds, mostly connected with Government services, which are exempt from the operation of the Act and this publication contains no particulars relating to them.
- 3. As regards non-Indian insurers, most of them carry on insurance busis ness other than life. Out of the total number of 92 non-Indian insurers, 76 carry on insurance business other than life, 5 carry on life business only, and 11 carry on life business along with other insurance business. Of the latter 16 insurers, 11 are constituted in the United Kingdom, 4 in the British Dominions and Colonies and 1 in Switzerland.

The lists of Indian and non-Indian insurers published on pages 17—24 show the class or classes of insurance business for which they stood registered on 31st December, 1943.

#### TIFE INSURANCE BUSINESS.

- 4. The total new life insurance business effected in India during the year 1942 amounted to 1,78,000 policies insuring a sum of Rs. 42·83 crores and yielding an annual premium of Rs. 2·22 crores of which the new business done by Indian insurers amounted to 1,69,000 policies insuring a sum of Rs. 36·47 crores and having a premium income of Rs. 1·91 crores. The share of the British insurers in respect of new sums insured is Rs. 3·64 crores, of the Dominion and Colonial insurers Rs. 2·63 crores, and of the single Swiss insurer Rs.0·09 crore. The average sum insured per policy under the new policies issued in India by Indian insurers is Rs. 2,158 and under those issued by non-Indian insurers Rs. 6.788.
- 5. The total life insurance business effected in India and remaining in force at the end of 1942 amounted to 16,61,000 policies insuring a total sum of

- Rs. 322.94 crores including reversionary bonus additions and having a premium income of Rs. 16.06 crores. Of this the share of Indian insurers is represented by 14,64,000 policies insuring a sum of Rs. 250.68 crores and having a premium income of Rs. 12.07 crores.
- 6. The total new annuity business effected during the year 1942 was for the amount of Rs. 4,55,000 per annum of which the share of Indian insurers was Rs. 1,08,000 per annum. The total annuity business remaining in force at the end of that year was for the amount of Rs. 37,04,000 per annum, of which the amount payable by Indian insurers was Rs. 17,83,000 per annum.

Particulars relating to new business for 1942 and total business in force at the end of that year in respect of each Indian and non-Indian insurer are given on pages 25—34.

- 7. Some Indian Life Offices had been operating outside India also. The total new sums insured by these Offices outside India in 1942 amounted to Rs. 1.42 crores yielding an annual premium of Rs. 0.08 crore and the total sums insured including reversionary bonus additions remaining in force at the end of 1942 amounted to Rs. 15.92 crores having a premium income of Rs. 0.59 crore.
- 8. The total new sums insured by Indian Life Offices in 1942 amounted to Rs. 37.89 crores, the total sums insured in force at the end of the year to Rs. 266.60 crores and the total revenue income to Rs. 16.54 crores. The average sum insured per policy and the average premium per Rs. 1,000 sum insured in respect of the new business for the year 1942 were Rs. 2,193 and Rs. 52.6 respectively, and the corresponding figures for the total business in force at the end of the year were Rs. 1,745 and Rs. 47.5.
- 9. The life insurance funds increased by Rs. 7·15 crores and amounted to Rs. 75·94 crores at the end of the year. The rate of interest earned on the life funds during the year after deduction of income-tax at source was 3·94 per cent.

The net rates of interest realized by the Indian Life Offices in each of the past five years are as follows:—

Year		1938.	1939.	1940.	1941.	1942.
Rate of interest per annum	••	5-15	4.68	4.37	4.17	3-94

The total expenses of management expressed as a percentage of the premium income during each of the last five years are as follows:—

Year	••	••		1938.	1939.	1940.	1941.	1942.
Expense ratio	••	***	in the	31.7	33.2	28.9	27-4	26.7

If the figures of half a dozen insurers having the largest premium income are excluded, the expense ratio in the case of remaining insurers is found to be as under:—

Year	• •		1938.	1939.	1940.	1941.	1942.
Expense ratio	••		41.1	41.8	36.0	34.3	31.3

10. There were 177 Indian Life Offices which submitted their accounts and business returns for the year 1942 under the provisions of the Insurance Act. The present issue of the Year Book contains the results of the latest valuations of these Life Offices, of which 46 were received after the publication of the last issue of the Year Book. The results of the valuations submitted during the year show that the Life Offices concerned had in the aggregate 7,35,000 policies in force on the valuation dates insuring a sum of Rs. 132.41 crores including bonus additions and annuities of Rs. 15.60 lakhs yielding an annual premium income of Rs. 6.41 crores. The life insurance funds of these Life Offices amounted to Rs. 43.31 crores. The valuations disclosed a surplus in the case of 25 Life Offices and a deficit in the case of 21 Life Offices. The total surplus of these Life Offices amounted to Rs.185.0 lakhs of which Rs. 145·1 lakhs was allocated to the policy-holders and Rs.12·5 lakhs to the shareholders and the balance was either set aside as an additional reserve or was carried forward unappropriated. The deficit in the case of the remaining Life Offices amounted to Rs. 34.9 lakhs. Of these, the deficit in the case of 16 was covered by the available paid-up capital. In the case of the remaining 5 Life Offices the deficit was not so covered.

11. Since the issue of the last Year Book the transfer of life business of Zenith Life Assurance Co., Ltd., Bombay, to British India General Insurance Company, Ltd., Bombay, has been sanctioned by the Court.

Genuine Insurance Co., Ltd., Calcutta, and New State of India Insurance Co., Ltd. Lahore, have since been ordered by the Courts to be wound up.

# NEW FLOTATIONS.

12. It will be seen from the list of Indian Insurers on pages 17—21 of this issue that a large number of new insurance companies have been floated recently and that several insurers transacting life assurance business only have extended their activities to other classes such as Fire, Marine and Miscellaneous insurance business. In this connection the Superintendent of Insurance cannot but repeat the following warning issued fifteen years ago by the then Government Actuary.

"Those contemplating the formation of any new life assurance companies would do well to study the table in my Report showing the lengthy periods during which no dividends were paid by many of the existing com-

panies, especially by those established in the past 18 or so years, and realise that the companies shown in that list are the survivors of a larger number, the remainder of which have been unsuccessful. Further, as some of the younger companies have been mu h handicapped by having too small an amount of paid-up capital, I suggest that no company should commence business until at least 2 lakhs of paid-up capital has been secured. In the meantime, however, I think it undesirable for any more new life assurance companies to be established as their advent can only add to the reckless and indiscriminate endeavour to secure new business, regardless of cost, which now-a-days has become too prevalent. "

It is claimed by some that since the per capita insurance carried by the population in India is very small, in fact the lowest of all civilised countries of the world, there is room in this country for several more companies, particularly life insurance companies, but it must be remembered that the economic condition of the population is also admittedly very poor and unless there is considerable improvement in this respect we cannot look forward to any great increase in the total volume of business available. In this connection the following table giving the total new life insurance business completed by companies operating in India in each year of the decade ending with 31st December 1942, would be of interest.

New Life Insurance business completed in India (in Crores of Rupees).

	Year	:•	Indian Insurers.	Non-Indian Insurers.	Total.
1933			 24.0	9.0	33.0
1934			 28.0	10.0	$38 \cdot 0$
1935			 31.5	11.7	$43 \cdot 2$
1936			 36.0	10.8	46.8
1937			 39.0	9.7	48.7
1938		• •	 43.3	8.4	$51 \cdot 7$
1939			 42.5	4.1	46.6
1940			 32.3	3.8	36.1
1941			 34.1	5.4	39.5
1942		• • •	 36.5	$6\cdot \overline{4}$	42.9

It will be observed that although there has been a more or less steady increase in the volume of new business transacted, the rate of increase is not high enough to warrant the large number of new flotations. It is understood. that the business done in 1943 shows a considerable increase but this has to be attributed to purely wartime conditions. The above table therefore shows that unless it could be assumed that with the industrial regeneration, may we say revolution, which it is hoped will take place in India in the post-war period, the economic condition of the population would be substantially improved and that too suddenly, the conclusion is inescapable that both the large number of new flotations and the several requests for expansion of existing companies in other lines of insurance activity is being overdone. As in nature, so in any field of commercial activity slow growth and expansion makes for greater stability and permanence than when the growth is too rapid. It is an inevitable economic law that there is always a time lag, a fairly large one at that, between industrial activity and the consequent general rise in the economic level of the population. It is feared that this time lag itself, even if other things are satisfactory, may upset the calculations of some of the new company promoters. If the hope that the post-war period will witness a period of high degree of industrial activity and consequent prosperity is not actually realised to the large extent the hope is entertained, the struggle for existence among the insurers may take an acute form and some companies established in the past and who are at present struggling on the margin of solvency may be caught in the vortex of competition and be pulled down.

- 13. I have again to refer to the Insurance Year Book 1929 in which the then Government Actuary comments about the causes of the large number of liquidations during the period of 16 years since the commencement of the Indian Life Assurance Companies Act, 1912. The table given therein shows that out of 29 companies which went into liquidation as many as ten did so within 2 years of starting business and the rest had to be liquidated at various periods between 2 and 11 years. This shows with more force than words could command the great risk of insolvency to which an insurance company, particularly a life insurance company, is subject during the first decade or more of its existence and the importance of carefully nursing it during this period.
- 14. I hope that what I have stated above will serve to provide a timely warning to those who contemplate starting insurance companies and also to the new insurers who have come into the field so that those who are at the helm of affairs of newly started companies will see to it that their houses are always kept in order so as to spare the Superintendent of Insurance, who has to keep a constant vigil to see that the interests of policy-holders are never jeopardised, the unpleasant task of taking action under one or other of the mandatory provisions of the Act.

# REQUEST FOR ADDITIONAL CAPITAL.

- 15. The above question naturally leads to and is closely associated with the question of issue of fresh capital for new or existing enterprises. It must be remembered that the purpose of the control of Capital Issues is not only to check inflation but also to ensure that investable funds are not lured into enterprises which appear to be transacted rather for the benefit of the promoters than for any advantage to the general public interest. The Superintendent of Insurance cannot therefore recommend to the Government any request for issue of further capital, unless the affairs of the insurer are likely to be well managed in the future. The fact that the requirements regarding deposit have been completed does not afford any guarantee that the affairs of the insurer will be well managed. The main object of the deposit is to discourage unsubstantial concerns with slender resources from undertaking insurance business and it is not primarily to the deposit that a policy-holder should look for security which would become insignificant as compared with the liability as and when the business of the company expands. A more reliable indication is the manner in which the existing business has been conducted and in cases where there exists a deficit the Superintendent of Insurance will require something more than mere promises to convince him that the management which is responsible for the present plight of the company will be able to conduct the business in future on sound and economic lines.
- 16. Where the request for additional capital is received from an insurer whose affairs have been well managed in the past as evidenced by the returns

submitted under the Act and the amount seems necessary for the objects specified in the application, the Superintendent of Insurance would have no objection to recommending the application to Government. But many applications are received from insurers whose life business has shown a deficiency, the object for issuing fresh capital being in most cases to start a fresh class of business based mainly in the hope that the profits of the new class will extinguish the existing deficiency in the life fund. Profits and losses do not obey the laws of simple probability but the former has to be deliberately worked for and if unfortunately the company makes a loss, the life-policy-holders will be worse off than before as the existing capital, which was in its entirety available to lifepolicy-holders only, ceases to be so when a new class of business is transacted. Their interests however demand that they should not depend on the fortunes of the new venture. No life assurance company in deficiency can contemplate embarking on other classes of insurance business without giving careful consideration to how best it could safeguard the interests of its life policy-The ideal solution would be to effect a reduction in the capital and transfer the amount thus released to the credit of the life assurance fund such that this fund is increased to a figure not less than the amount of the policyliabilities. This is, however, a complicated and slow process as the intervention of the Court would be necessary to reduce capital and until this is done, the insurer might consider whether the shortfall in the life insurance fund cannot be made good by a transfer of the requisite amount of assets to the life Balance Sheet by creation of a fictitious asset in the non-life Balance Sheet shown against capital, to be wiped off by future profits pertaining to shareholders.

17. In some cases where the valuation has disclosed a position of insolvency (i.e. deficit not covered by paid-up capital) request for permission to raise further capital has been made though the uncalled capital is enough to cover the deficit several times over. Very often the promoters of the company who hold the bulk of the shares are unwilling to sink further capital themselves knowing the concern to be in great difficulties and are anxious to rope in new shareholders rather than call up a part of the unpaid capital and with this object in view ask for permission to raise fresh capital. Sometimes they ask for this permission under the pretext that the company desires to commence transacting other classes of business and thereby try to mask the real position of insolvency from the investing public. It is but fair, that in these cases the insurer should be asked to cover the deficiency by making calls on the existing shares. The existing shareholders have a legal liability to meet the deficits and particularly where a call of even part of the uncalled capital will restore solvency, there would not appear to be any justification for trying to rope in new shareholders.

# Some Pitfalls of Insurance Business.

- 18. The main reasons why several insurers are finding it difficult to show themselves solvent on proper valuation bases are:—
  - (a) Inadequacy of Premiums.
  - (b) Heavy Expenses.
  - (c) Heavy Early Lapses.

19. Inadequacy of Premiums.—An ordinary trader who manufactures the article first and sells it later would hardly need any advice that he should not sell below cost if he is anxious that his business should be kept going. In insurance business, more so in life insurance business, however, the process is reversed, for the commodity traded in is sold first and the cost incurred later, so that it becomes necessary to strike this note of warning that it would be unwise to sell at a low price taking a very optimistic view of the cost of production. When a policy is effected the life office makes a sale and the premium is the sale price, whereas the cost is to be incurred in the future and will be determined by the future experience of the company as regards interest, mortality and expenses. It is possible to take too optimistic a view of the future trend of these three elements and quote rates of premium which on the average would not provide even the sum assured, let alone bonuses to participating policyholders, when the policy becomes a claim. If that is so, the concern will sooner or later find itself in great difficulties.

Of the three factors, mortality is fortunately more or less constant and, if anything, steadily decreasing, at least as judged from the periodical investigations of the 'Oriental'. Unless therefore the company is anxious to grab any type of business that comes before it without proper scrutiny it would not, generally speaking, be let down under this head. Expense is a factor which is entirely under the control of the company, and a company that has sold at a low price has to make all sacrifices necessary, so that the assumptions made in the sale price, the premium, are not falsified adversely. On the contrary, one is sorry to have to observe that most Indian companies give a loose rein to this factor so that it aggravates, instead of alleviating, the adverse position caused by the play of the third and the most important factor of interest.

That the ruling rate of interest in the market has been steadily decreasing for a few years past, and more so particularly after the whole world has been plunged in a war of colossal dimensions, is known to all. In addition to this, taxation has been heavy with the result that the net yield on the invested funds of life insurance companies has been very steeply decreasing. Although it is reasonable to assume that in the post-war period taxation would not be so heavy as what it is now, yet the downward trend in the rate of interest alone is such as should give great concern to the executives of life insurance companies and make them give very great consideration to the question as to whether the premiums that they are now quoting under the various tables are adequate to provide the benefits to the policy-holders and also disclose a profit. Several companies have incorporated in their prospectuses premiums calculated at rates of interest higher than 3½ per cent. and in some cases the rate of interest employed is even as high as 4 per cent. or more. Since the rate of interest that is employed in the calculation of premiums is the net rate which the company on the average expects to earn on the invested funds during the period of the existence of the policy, it is high time that these companies took stock of the situation and revised their premium rates to conform to the yield on the type of investments in which alone life insurance companies can safely invest their funds. On the basis of the ruling rate of interest in the market at present, even a rate of interest of 3½ per cent. for the calculation of premiums would be hard to justify when the current rates of tax are taken into account, even ignoring the surcharge on income-tax. It can therefore be safely asserted that any premiums appearing in the prospectuses of companies calculated at a rate of interest higher than 3½ per cent. would be unsound, and it is hoped that such companies will take immediate steps to calculate their premiums at such a net rate of interest as on the basis of their investment policy they may safely hope to earn. It is hoped that life insurance companies will give serious thought to this warning and take it in the spirit in which it is offered, namely, an earnest desire to see Indian insurance business occupy the same high place that insurance business does in the other civilized countries of the world. This is a subject to which the writer has been giving serious consideration for several years and thought fit to give expression in as plain terms as possible through the medium of the Year Book, to write which he would perhaps have only one opportunity.

- 20. Heavy Expenses.—It has been time and again stressed that insurers should reduce their expenses and make them conform to the assumptions made in their premiums and valuations and it is hoped that they will pay particular attention to this factor which is so very vital for the successful conduct of life insurance business, the more so as it is one which is to a large extent within their control and a definite index of efficiency of management.
- 21. Heavy Early Lapses.—One reason for the high renewal expense ratio of many insurers is the very heavy lapses, particularly during the early years of a policy's existence. For any company to function economically it must get a minimum quota of well chosen new business but merely getting business will not be of any benefit to the insurer, unless the business continues to remain on his books. The following table compares the lapse experience of five old established insurers with that of five recently established insurers.

Net lapses in each of the years 1938, 39 and 40 of the new business done in the year 1938 expressed as a percentage of the business done in that year (1938).

				Net laps	e per cent.
	Y	ear		Old insurers	Young insurers
1938 1939 1940	 • •	• •	 	2·05 18·32 8·79	10·49 33·61 9·83
			-	29 • 16	53.93

The table shows that about 29 per cent. of the business transacted by old established insurers lapsed in slightly less than  $2\frac{1}{2}$  years and in the case of young insurers the percentage is as high as 54. The bulk of the lapses in the year 1939 must relate to policies under which not even one full year's premiums had been paid. It is well known that the expenses of many insurers exceed even the first year's premiums received and the important fact therefore emerges that nearly 20% of the business done by old established insurers and slightly more than double this percentage of the business done by young insurers result in a loss to the insurers. It is sincerely hoped that the insurers generally and

young insurers particularly will realise that sound selection of risks is not confined to the element of mortality alone but also extends to the question of persistence of the policy and that they would devote as much attention to the question of conserving existing business as they do to getting new business.

# VALUATIONS OF INDIAN INSURERS.

- 22. The improvement noted in the valuation bases in the last two issues of the Year Book continued during the year. The improvement, however, was comparatively more manifest in the matter of interest rate but in the matter of expenses the divergence between the valuation assumption and the actual experience was still fairly wide on the wrong side. In fact 4 out of 46 valuations received during the year 1943 had to be questioned under Section 22 of the Insurance Act.
- 23. Interest Basis.—As regards the rate of interest to be used in the valuation, a few hold the view that the post-war period would bring about a large increase in the ruling rate of interest and quote the analogy of the post-war period of the last war in support of their theory. It surpasses one's imagination why the experience during the last four and a half years of this war, which has demonstrated clearly the absurdity of basing any conclusions as regards the trend of interest rates on the analogy of the conditions during the last war, should suddenly reverse itself at the close of the war and conform with what happened in the financial world in the post-war period of the last war. Whatever may be the course of events in the large world of finance in the post-war period, it is positively dangerous to advance this theory in support of advice to life insurance companies, particularly, to weaken their bases of valuation. In his professional work the actuary is mainly concerned with forecasting the future, and actuarial science teaches time and again that any view taken of the future more optimistic than what the present would warrant, should be tempered with caution and moderation even if any feeling of optimism could be justified at all. It also teaches that even when the present is rosy it would be dangerous to assume that the same conditions would persist in the future. The actuary who tries to weaken the interest basis in the valuation should be the first to see, if his professional equipment is adequate, that even if his theory comes true there would be large depreciation in the invested funds of the Company and he cannot set the inflated assets of the present against an inadquate provision for the liability arrived at on the basis of large increase in the future rate of interest without making adequate provision for the depreciation which the increase in the rate of interest would engender.
- 24. Yet this is what has been done in the past and surpluses resulting from such weak valuations as at 4, 4½ and even 5% rate of interest have been distributed to the hilt to policy-holders and share-holders without making any provision in the shape of a reserve which would stand by the Company during periods of adversity. It would be best here to draw attention to the fact that the rate of interest used in the valuation is the net rate, and one can imagine what should be the corresponding gross rate of interest the company is expected to earn on its funds. It is hoped that those at the helm of affairs of companies would themselves refrain from adopting advice of this type calculated to weaken the intrinsic position of the Company. It is gratifying to find from the records of this office that at least in one case the manager of a company asked the

actuary whether it would be prudent to distribute the surplus resulting from a valuation made on such a weak basis as  $4\frac{1}{2}\%$  interest, but he was informed that in the interests of competition he should distribute the surplus as otherwise he would secure no new business. The subsequent history of the company can easily be imagined. The position of the Company progressively deteriorated with the result that the Superintendent of Insurance had to commence action under Section 33. It is very significant that the Company showed itself insolvent by very nearly the amount distributed as a result of the earlier valuation on  $4\frac{1}{2}\%$  basis and against which distribution the manager of the Company demurred. Had the Company adopted the more prudent course which appealed to the manager, it would have been spared the mortification and the subsequent unpopularity of conducting an investigation at the instance of this office to find out its real position.

## ALLOCATION OF SURPLUS TO SHARE-HOLDERS.

25. Life Insurance companies, are virtually in the position of trustees of the policy-holders and this feature should be borne in mind in allocating any surplus between shareholders and policy-holders. In the case of any well established company the capital will be very small compared to the life fund. Moreover the bonuses paid to the policy-holders are merely a return of the excess premiums contributed by them and the premiums under the withprofit policies contain a specific loading for this purpose. It must also be remembered that the with-profit policy-holders also are risking the bonus loading paid by them, as bonuses are not guaranteed. In fact it is the amount received as bonus loading which provides the first line of defence if the insurer incurs a loss and only when this amount is insufficient the guarantee of the share capital comes into play and that too only to supplement the above amount. It is to be added in this connection that the risk involved in this guarantee rapidly diminishes and bocomes insignificant as the concern acquires strength by proper management. None will grudge the shareholders a small proportion of the distributable surplus as a return for the guarantee the capital provide; and the services initially rendered by them but any proportion higher than 10% would be hard to defend. In the case of some companies the Articles of Association provide that dividends on the share capital at a certain rate is a first charge on the surplus and only the balance, if any, will be divided between the shareholders and policy-holders in the ratio of, say, 1 to 9. In one particular case the Articles do not provide for any minimum percentage to be allocated to the policy-holders and this has been taken advantage of by the management to allocate a disproportionately large part of the total amount distributed to the shareholders. The Superintendent of Insurance hopes that the insurance companies with such undesirable features will take steps to have their Articles amended to ensure that such inequitable allocations are avoided.

# NEGOTIATIONS WITH INDIAN STATES FOR CONCESSIONS.

26. The enactment of Insurance Acts of their own by some of the Indian States has multiplied the deposit, compulsory investments, returns, etc., requirements to be complied with by an insurer or provident society carrying

on business in British India and the States. The only way to give the necessary relief to insurers and provident societies is to grant concessions under section 116 of the Insurance Act, 1938 on a principle of strict reciprocity. As a result of negotiations, the following concessions have been obtained till now.

Mysore.—Insurers registered in British India are exempted completely from deposit requirements, have to keep assets equal to only 45% of their Mysore liabilities in trust in Mysore, are exempted from keeping books of accounts in Mysore subject to certain conditions and need submit only the same returns as are furnished in Britih India together with some details about Mysore business. The securities of the Government of India are approved securities in Mysore.

Baroda.—Similar concessions in respect of deposit, investments, keeping books of accounts and submission of returns are granted by the Baroda Government also to insurers registered in British India.

Travancore.—Deposits have been reduced to Rs. 50,000 for life business and Rs. 10,000 for each non-life class of business.

27. Further negotiations with Indian States are in progress and it is hoped that the following concessions will be obtained in the near future:—

Insurers.—The percentage of the State liabilities to be covered by assets in trust in the State will be increased to 55 but this will be given credit for in British India also. Concessions similar to those granted by Mysore and Baroda may be obtained from Travancore.

Provident Societies.—The second and subsequent instalments of deposit to be made in a State will be based on the premium income in that State. Books of account will be kept in British India but will be produced in the State whenever the State authorities require. The same returns as in British India will be submitted in the State also.

Broadbasing the definition of "approved securities" in each State and in British India to enable an insurer or a provident society to find some securities common to all the areas of its business is also under consideration.

It is hoped that sufficient concessions will be achieved ere 'ong in the spirit of give and take to remove all unnecessary hardships in the way of insurers and provident societies operating anywhere in India.

# Policies of Persons in Enemy Occupied Territory (Including Prisoners of War) and Evacuees.

28. One of the special problems which insurers had to face almost suddenly during the year 1942 was in respect of the policies of persons who were left behind in the countries occupied by Japan, particularly Malaya and Burma or who evacuated to India from these countries. Some pressure was brought

to bear on Government that it should introduce Legislation to safeguard the interests of these policy-holders. It is, however, very gratifying to note that generally speaking the insurers have risen equal to the occasion and have themselves given concessions which should be considered nothing but generous and in some cases they go far beyond any concessions that could compulsorily be imposed by legislation.

29. The Superintendent of Insurance is aware of the very generous decision of an Indian insurer in terms of which the claims arising during the period of emergency under policies held by persons left behind in enemy occupied countries will be met in full in all cases subject only to deduction of unpaid premia accumulated at  $3\frac{1}{2}\%$ , though some might have lapsed under the terms of the policy-contracts: policies which lapse during this period will be revived on very generous terms as soon as communications are restored. As regards evacuee policy-holders the above insurer advances the premiums on being satisfied that the policy-holders cannot meet them, which are treated as debts against the policies.

Another concession given by some insurers is in regard to waiving under certain circumstances of extra premiums payable by prisoners of war.

DELAY IN THE PUBLICATION OF THE YEAR BOOK.

- 30. An endeavour has been made to issue the Year Book about four months earlier this year. This has been possible only by publishing the matter as available on the 31st December 1943, whereas formerly the publication used to wait for particulars coming in even as late as April or May of the year of issue. As was pointed out in the last issue any material advancement of the date of appearance of the Year Book can be achieved only by the cooperation of the insurers who must furnish their returns with complete particulars well before the expiry of the maximum time allowed to them under the Act. Even during the year 1943 as many as 29 notices for action under Section 102 of the A t had to be issued for delay in furnishing the returns relating to the year 1942. Of these 23 were issued in respect of insurers not transacting any business outside India and whose returns were due before 30th June 1943 and the balance in respect of other Indian insurers who had time under the Act till the 30th September 1943. One gratifying feature is that 27 Indian insurers who had time till 30th September 1943 furnished their returns before 31st July 1943 and 35 before 31st August 1943. For earlier publication of the Year Book the aim should be that all insurers, Indian or non-Indian, big or small, should, as a normal feature, furnish the returns before 30th June of the year succeeding the one to which the returns relate.
- 31. A further point to be noted in this connection is that though this is the fourth year for which insurers are submitting returns under this Act, some still send these full of defects though most of these defects had been pointed out to them in the previous years. In sending corrected returns later there is considerable delay. Both these aspects should be improved if the summaries of the returns are to be incorporated in the Year Book.
- 32. There is some improvement in the case of non-Indian insurers, many of whom furnished before 31st December 1943, particulars at least about their Indian business for the Year 1942. This does not necessarily mean

that they are complying with the requirements of Section 64, as most of these returns were received from their Home offices. In 13 cases notices of action under Section 102 had to be issued before the returns were received. It is hoped that such of these insurers as are not doing so now would comply with Section 64 which requires them to keep at their principal offices in British India such books of account, registers and documents as will enable the accounts, statements and abstracts which they are required under this Act to furnish to the Superintendent of Insurance in respect of the insurance business transacted by them in India, to be compiled and, if necessary, checked by the Superintendent of Insurance and if this is done compliance with the provisions of Sections 11 and 15 or 16 of the Act would be rendered easier.

FIRE, MARINE AND MISCELLANEOUS INSURANCE BUSINESS.

33. The net Indian premium income of all insurers under insurance business other than life insurance during 1942 was Rs. 7,38 lakks of which the Indian insurers' share was Rs. 2,06 lakks and that of the non-Indian insurers Rs. 5,32 lakks. The total amount is composed of—

Rs. 2,47 lakhs from fire,

Rs. 3.87 lakhs from marine, and

Rs. 1,04 lakhs from miscellaneous insurance business.

The Indian insurers received-

Rs. 1,09 lakhs from fire,

Rs. 61 lakhs from marine, and

Rs. 36 lakhs from miscellaneous insurance business.

The non-Indian insurers received-

Rs. 1,38 lakhs from fire,

Rs. 3,26 lakhs from marine, and

Rs. 68 lakhs from miscellaneous insurance business.

The distribution of this income amongst insurers constituted in different countries is shown in the following table:—

Insurers consti	tuted	in	1	Fire.	Marine.	Miscella- neous.	Total.
and a second	THE THE SECTION ASSESSMENT	unicontent of III statem		•	(In lakhs	of rupees)	The second second
United Kingdom			••	109.5	194.5	60 · 2	364 · 2
Dominions and Colonies			••	26.6	129.0	7.8	163 · 4
Continent of Europe		• • •		0.8		••	0.9
Јата		••	!	0.6	2.3		2.9
		Total		137.6	325.8	68-0	531.4

From the net figures given above it is not possible to form a correct estimate of the total business effected in India as a considerable portion of Indian business of both Indian and non-Indian insurers is said to be re-insured outside India.

34. The Indian insurers who transact a substantial amount of fire, marine or miscellaneous insurance business also operate outside India. These insurers had a net premium income of Rs. 1,14 lakhs in 1942 from business outside India.

Particulars of fire, marine and miscellaneous insurance business of Indian and non-Indian Insurers are given on pages 79—83.

# ASSETS OF INDIAN INSURERS.

35. The following is a summary of the assets of Indian Insurers:

				•	Rs.
				(3	[n erores.)
Mortgages on property					1.92
Loans on policies within their surrender va	lues				8.59
Loans on stocks and shares, etc					0.18
Other loans					0.49
Indian Government securities					84-14
Securities of Indian States					0.55
British, Colonial and Foreign Government	Securities				0.79
Municipal, Port and Improvement Trust S	ecurities, et	e			6.74
Shares in Indian companies					7.93
Land and house property					5.77
Agents' balances outstanding premiums, ou	itstanding	and acer	ued inter	est,	
etc				•••	4-13
Deposit, cash and stamps					4.47
Miscellaneous	• •	• •		• •	1.03
		T	otal		96.73

It will be seen that the bulk of the investments are in stock exchange securities which amount to Rs. 68.92 crores after allowing for an investment fluctuation fund of Rs 1.23 crores provided for in the balance-sheets and constitute about 72 per cent. of the total seets after deduction of the investment fluctuation fund.

Summary of balance sheets of Indian insurers as at the end of the year 1942 is published on pages 84—115.

# Indian Assets of non-Indian Insurers.

33. The total assets in India of non-Indian insurers amount to Rs. 33.15 crores of which Rs. 18.59 crores represents the assets of insurers constituted in the United Kingdom, Rs. 14.11 crores those of insurers constituted in the Dominions and Co onies, Rs. 0.26 crore of the American insurers, Rs. 0.15 crore of the Continental insurers and Rs. 0.04 crore of the one Javanese insurer. Out of this total amount of Rs. 33.15 crores, Rs. 23.14 crores represents assets in India of insurers who carry on life insurance business in India either solely or along with other insurance business. The assets in India of these insurers are shown on page 34. The assets in India of other non-Indian insurers are shown on pages 80—83.

# PROVIDENT SOCIETIES.

- 37. The particulars of the provident societies are set out in the present Year Book in the same way as in the previous year. Between 1st April 1943, and 31st December 1943, 5 societies were newly registered under the Insurance Act, 3 of which were established in the Bombay Presidency and one each in the Bengal and the Madras Presidencies. On 31st December 1943 there were in existance 143 provident societies which had made at least the initial deposit under the Act while the number among them whose registration was renewed as on 1st July 1943, for one year from that date was only 122. The following paragraphs relate only to the societies which have made at least the initial deposit under the Act.
- 38. All the societies are carrying on insurance business under the contingencies covered by section 65 (2) (a) only. The total new business effected by the societies during the year 1942 amounted to 11,600 policies insuring a sum of Rs. 37,34 thousands and annuities for Rs. 1,300 per annum. The premium income received during the year on these policies amounted to Rs. 1,62 thousands. The business in force at the end of the year amounted to 58,700 policies insuring a total sum of Rs. 1,59,75 thousands including reversionary bonus additions and annuities for Rs. 17,500 per annum.
- 39. The total life insurance funds at the end of 1942 amounted to Rs. 53,24 thousands as compared with Rs. 51,90 thousands at the beginning of the year, showing a net increase of Rs. 1,34 thousands. The net rate of interest realized by the societies in the year was 3.8 per cent. and the total expenses of management expressed as a percentage of the premium income was 52.5. Out of 131 societies, which have submitted their returns for the year ending 31st December 1942, 44 had renewal expense ratios, calculated in the prescribed way, in excess of 100 per cent. and 31 between 50 per cent. and 100 per cent. This may be compared with the average provision for renewal expenses made in the premiums, in the rules or in the valuations, which is rarely above 25 per cent. Further, the life funds of 29 societies were negative.

A summary of the balance sheets as at 31st December 1942 and the revenue accounts for the year ended on that date are given on pp. 120—132 of this Year Book. The summaries of valuation returns appear on pp. 133—136.

40. There appears to have been some recognition of the necessity for promptness in furnishing the returns under the Act within the time allowed; but the position still needs considerable improvement in this respect. In 23 cases notices under section 102 of the Act had to be issued for failure to furnish the returns. In the majority of cases, however, the returns were defective or incorrect even in the simplest particulars, and in a large number of cases the defects were not removed even after protracted correspondence, although the defects were pointed out more than once.

SIMLA,

L. S. VAIDYANATHAN,

Dated the 15th March 1944: HI20CD

Superintendent of Insurance.

# RENEWAL FEES.

A. The fee prescribed in Rule 24 of the Insurance Rules, for renewal of registration under section 3A of the Insurance Act, 1938, for each class of insurance business for which the insurer is registered is as follows:—

Where total premuim income for each class (including annuity considerations, if any)	Fee payable for each class	
,		Rs.
Does not exceed Rs. 1,00,000	 	50
Exceeds Rs. 1,00,000 but does not exceed Rs. 2,00,000	 	100
Exceeds Rs. 2,00,000 but does not exceed Rs. 4,00,000	 :•	150
Exceeds Rs. 4,00,000 but does not exceed Rs. 6,00,000	 ·.	250
Exceeds Rs. 6,00,000 but does not exceed Rs. 10,00,000	 	375
Exceeds Rs. 10,00,000	 	500

*This income is the premium income shown in the revenue account for that class of insurance business prepared under the Act for the calendar year 1943, in respect of the renewal of registration for the year 1945, the application and chalan in payment of the fees for which should reach the office of the Superintendent of Insurance on or before the 31st December 1944.

In relation to insurers who are required to furnish returns in accordance with sub-section (2) of section 16 of the Act, the reference to the calendar year 1943 above may be construed as a reference to the accounting year 1942-43 covered by the revenue account furnished under clause (b) of the said sub-section, except where the calendar year 1943 is also an accounting year.

B. The next renewal of registration for provident societies under section 70A of the Act, is for the year commencing 1st July 1944, the application and chalan in payment of the fees for which should reach the office of the Superintendent of Insurance on or before the 30th June 1944. The fee for renewal of registration is Rs. 50 where the total gross premium income including annuity considerations, admission fees and other fees, if any, as shown in the revenue account for the calendar year 1942 (or 1943 where the returns for 1943 have been furnished to the Superintendent of Insurance) is less than Rs. 50,000 and Rs. 100 in all other cases.

List of Indian Insurers.

Mames of Insurers who are subject to provisions of Part IV of the Insurance Act, 1938, have been marked with (M).
